

# HealSearch

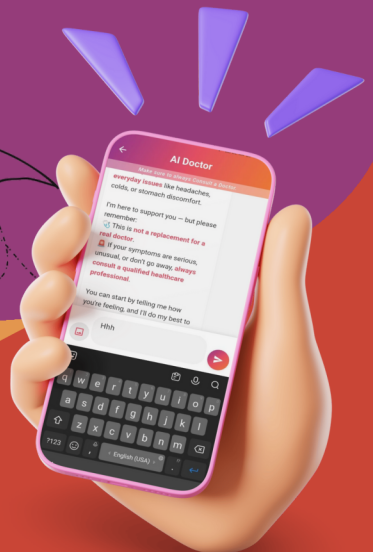

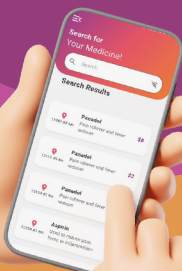

Your HealthCare Companion

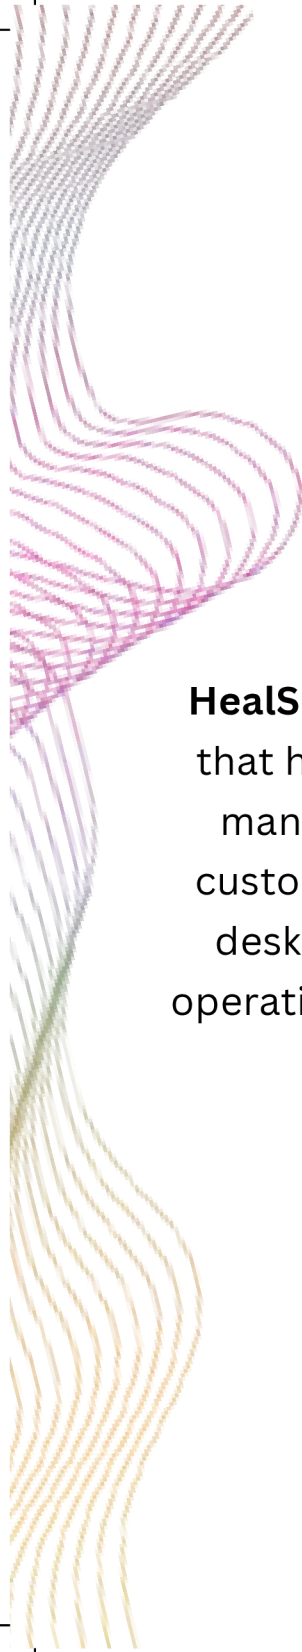

Locate.  
Medicate.  
Feel Great

*"HealSearch helps you find, compare,  
and reserve medicines nearby –  
faster than ever."*

## About Us

**HealSearch** is a cross-platform application that helps pharmacies and medical stores manage inventory, sales, reporting, and customer support efficiently. Available on desktop and mobile, it streamlines daily operations and empowers staff with modern tools and an AI assistant.

# HealSearch Idea

## Problem

Pharmacies and medical stores often struggle with manual inventory tracking, slow sales processing, and lack of real-time reporting, leading to inefficiencies and errors.

## Solution

HealSearch digitizes pharmacy operations, offering real-time inventory management, order processing, automated reporting, and an AI-powered assistant for instant support—all accessible from desktop and mobile devices.

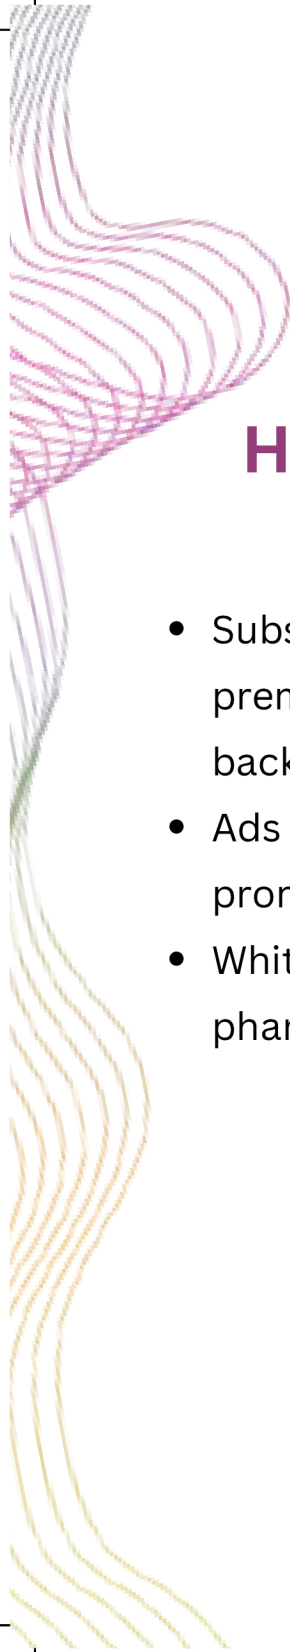

# HealSearch Funtions

- **Inventory Management:** Add, edit, search, and filter products with expiry tracking.
- **Order Processing:** Create and manage orders, generate invoices, and apply discounts.
- **User Management:** Register, authenticate, and manage user profiles.
- **Reporting:** Generate sales, inventory, and financial reports (PDF export).
- **Settings:** Customize theme, language, notifications, and backup.
- **AI Chatbot:** In-app assistant for user queries and guidance.
- **Location Integration (Mobile):** View stores/products on Google Maps.
- **Data Sync:** Real-time sync with Firebase and local backup.

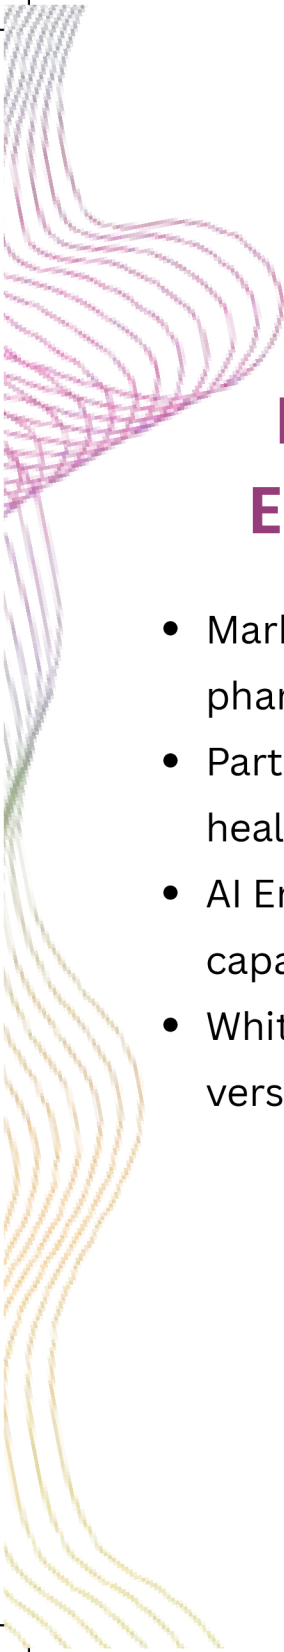

# HealSearch Revenue Model

- Subscription Plans: Monthly/annual fees for premium features (e.g., advanced reporting, backup).
- Ads & Promotions: Optional in-app promotions for pharmacies.
- White-Labeling: Custom versions for pharmacy chains.

# HealSearch Future Expansion & Growth

- Market Expansion: Target more regions and pharmacy chains.
- Partnerships: Integrate with suppliers, health services, and POS systems.
- AI Enhancements: Expand chatbot capabilities for medical queries.
- White-Label Solutions: Offer branded versions to large pharmacy networks.
